

TOUR DE POLOGNE CHOOSES VITTORIA SERVICE COURSE AS THE NEUTRAL SUPPORT IN THE RACE

For the second year in a row, the Italian brand will be the official neutral service of the Polish World tour.

Warsaw, 2021 June 30th - Once again in 2021, the Tour de Pologne will be able to count on the expertise, experience and quality of Vittoria's wheel gear and its specialized staff to provide rapid support to riders in case of puncture, fall or mechanical failure. There will be 3 cars and a motorcycle to assist the riders during all 7 days of the race. The numerous collaborations with athletes, federations, and teams present on the international scene are undoubtedly an important business card and are synonymous with professionalism, research, and ongoing commitment.

"We are especially pleased to collaborate with such an important company as Vittoria. Their presence and the quality of their tires raises the technical bar of our race and will allow the athletes to be assisted throughout the race. Continuous research and the desire to improve are just some of the values that unite Vittoria and the Tour de Pologne." says Czeslaw Lang, General Director of Tour de Pologne.

"Participating in World Tour races is very important for us and for the development of our products. Road tests on these occasions are priceless in terms of feedback, in order to constantly improve the quality. Our top-of-the-line "Corsa" road tire has been the everyday choice of professionals for years. Its strengths are its cotton casing and the graphene-enhanced compound. The cotton part offers flexibility to the tire, which results in continuous contact between the ground and the tire itself." explains Ernesto Garcia Domingo, Vittoria Group Sales Director.

In addition to serving as neutral in the race, Vittoria will also be supporting some of the world's top teams at the Tour de Pologne: Jumbo-Visma, UAE Team Emirates, Lotto Soudal, Team DSM, Astana, Education First-Nippo and Alpecin-Fenix.
