

# Tour de Pologne<sup>®</sup>

## **Tour de Pologne with BOPLAN security system**

Boplan<sup>®</sup> and Drutex together in the handlings of the barriers.

In a few days, Poland will witness the arrival of an innovative security system by the Belgian brand BOPLAN. All because of the upcoming Tour de Pologne, in which, for the first time in Poland, such modern solutions will be used in a multi-stage cycling race. Another partner of the Tour de Pologne, DRUTEX, is logistically supporting this project.

BOPLAN barriers and totems will be installed at the finish lines as well as in critical points along the race route.

BOPLAN is a Belgian brand specialized in the design and production of various reliable security systems whose materials are environmentally friendly and offer top technology in terms of installation and operation. The BOPLAN Science Centre is located in Wolverhampton, where the most advanced and innovative solutions are developed. The BOPLAN SPORT line is focused on the protection of sports events taking care of athletes, spectators and organisers.

This spring, the brand's solutions secured, among others, the route of the Flemish cycling classic and the Saxo Bank Classic. BOPLAN systems protected the cyclists from critical points and obstacles - such as cables on the race route, speed bumps and road signs. Today, the BOPLAN RACE BARRIER solution is the most advanced of its kind and the most modern in the brand's portfolio.

The Tour de Pologne is not only the most important cycling event in Poland, but also cooperation between race partners. There would be no implementation of BOPLAN solutions on the route, if not for the support of another partner of Tour de Pologne - DRUTEX. Since the beginning of its existence, this leading European manufacturer of windows, doors, roller shutters and external blinds has been strongly involved in many initiatives in the field of corporate social responsibility, including the promotion of sport and the partnership with the Tour de Pologne, is an example. It is worth mentioning, that apart from the Tour de Pologne, the brand has been the sponsor of the Tour of Nations, addressed to the U-23 riders for two years. Moreover, for many years it has been supporting the activities of MKS Baszta Bytow, a distinguished cycling club, under the aegis of which Czeslaw Lang competed years ago. As an official sponsor of this year's Tour de Pologne, DRUTEX - which is the logistic partner of the event was also responsible for the delivery of BOPLAN solutions - from Belgium to Poland, on the route of the race and back.
