

FARO: THE NEW HIGH-PERFORMANCE COFFEE GRINDER FROM STORM
The new, ergonomic, performant grinder was presented in London.

Susegana, 24 September 2021 - Attention to detail throughout the process is essential to obtain an excellent espresso, which is why Storm combined its need for extreme experimentation with the highest technology to create *Faro*. This new coffee grinder promises to revolutionize the grinding, allowing to fully express the personalities of the finest single origins through the sensitivity of the barista.

***Faro*: when precision, regularity, and consistency meet.**

The new Storm grinder is designed to achieve the best quality, integrating the brand's ergonomics and high-performance values. The setting of *Faro* is comfortable and intuitive with exceptional workability, whereas the adjustment with the maximum range allows baristas to get closer and closer to the perfect grain size.

Faro's design is inspired by the Storm philosophy. The aluminium body, wood details, and stainless steel speak of the culture of coffee as an experience that involves all senses. As in the entire Storm range, shapes and materials can create a dialogue between spaces and people, enhancing the unifying power of tasting an espresso.

Faro a new benchmark

Inspired by its particular shape and the union between Storm and the sea, the name *Faro* is inextricably linked to the brand's values of freedom. However, it is a simple word that encapsulates a profound meaning as a guide for sailors in the darkest nights, a new point of reference for the most ambitious baristas.
