

ASTORIA AT HOST 2021 WITH THE RESTYLING OF ITS HISTORICAL MACHINE
The Treviso brand is back with the new Plus4You at the most important trade fair in the catering sector.

Susegana, 20 October 2021 - Host, the most important trade fair in the Ho.Re.Ca sector, involving professionals and technicians worldwide, is back from 22nd to 26th October. It's an important moment to discuss the novelties and challenges of the future.

Astoria is present with its professional and domestic espresso coffee machines as the previous years, and it will be the perfect opportunity to demonstrate the will to restart after the last months marked by the pandemic.

The real novelty at the Astoria stand is the new **Plus4You R**, a restyling of the machine that made the history of the brand.

As in its past version, quality is guaranteed by an innovative regulation system, able to digitally control the individual groups in all phases of coffee extraction, from pre-infusion to delivery.

A new integrated retractable cup lifter offers ample working space, while a thermoregulation device allows Plus4You R to combine maximum efficiency with the most suitable temperature.

Each brewing group also has its tank allowing to adjust different temperatures for different blends, always guaranteeing maximum stability and in-cup yield.

Plus4You R is available in two different colors, both in the classic multi-boiler version and a new single boiler version.

Visitors can also immerse themselves in a vintage atmosphere with Hollywood, the machine with a design inspired by 1970s cinema, available in four pop colors. The shot timer with the indication of extraction times for each group has been renewed, so as the steam lances have increased their diameter. The tilting grid allows the machine to be used with both espresso cups and milk-based beverage glasses.

It will also be possible to view Loft, a domestic machine created to obtain high-quality espressos and cappuccinos at home. Compact and easy to use, it is available in four different colors to blend in perfectly with the design of your home.

Astoria awaits technicians and enthusiasts from 22nd to 26th October at Fiera Milano Rho in Hall 24 - STAND E52 E60 F51 F61.
