

## **Sidi leads SBK with Alvaro Bautista triumphing at GP Aragon**

The rider dominated the Superpole Race with a solo race.

Alvaro Bautista returns to victory in style. After two years on the sidelines, the Ducati rider triumphed in Aragon taking the lead from the outset and leading a solo race to cross the line more than five seconds ahead of second-placed Jonathan Rea.

"In every corner I knew where the limit was," he told the microphones, "and I knew not to go over it. I felt free on the saddle and I had total control of the bike."

The feeling with the bike was fundamental in the construction of this success, the watchword when it comes to Sidi and in particular one of the most racing boots of the Treviso brand. Bautista is in fact leading the SBK championship wearing the Mag 1 model, a real concentrate of functionality enclosed in a dynamic and essential style. The security of the closure is entrusted to the TECNO-3 rotor in Magnetic version while the fit is easy and fast thanks to the micrometric strap that adjusts the circumference of the cuff to fit perfectly to any size of the calf.

First in the Superpole Race, first in Race 2 and first in the World Championship: a Sunday to remember for the Spaniard who proved to be a formidable opponent for the continuation of the Championship. The next appointment is for 22-24 April, at Assen, where the challenge can continue.
