

**Sidi Crossfire 3 SRS shows off a new sparkling colour block version**  
Red and pink come together in a glamorous effect for the new limited colour scheme.

The winning pair.

There are many reasons why red and pink are a perfect match in a cheeky and energetic colour scheme, perfect for the bold character of the Crossfire 3 SRS, considered Sidi's most eccentric boot.

The new Limited Edition, dedicated to one of the most successful boots in the Maser company's catalogue, proposes in fact the combination of two colours belonging to the same chromatic scale where the pink upper perfectly integrates with the red bootleg, resulting in a boot with a strong personality that can be matched with the most extravagant looks.

The Crossfire 3 SRS is known for its technological details that meet the needs of motorcyclists, such as the Hyper Extension Block involved in the protection of the rider's ankle and tendons. Another strong point lies in the Flex System, which acts on the flexibility of the boot precisely assisted by the Adjustable Calf System that takes care of adjusting the cuff offering a comfortable fit favoured by a wide boot opening through simple adjustments.

When it comes to protection, the Crossfire 3 SRS doesn't spare itself by housing a replaceable PU inner protector plate with moulded rubber insert, which protects from engine heat and prolongs the life of the boot by limiting wear.

The removable and replaceable DOVETAIL SOLE SRS sole is designed to ensure perfect adherence to the bike and terrain for excellent safety and comfort. An enduro-specific version is also available.
