

Christmas by Sidi: here are the boots all riders would like to find under the tree
From touring boots to champions' choices, here are the models for an ideal wishlist

The Christmas holidays are the perfect time to take some time out for loved ones and devote yourself to what makes us happy. A motorbike trip, for example. Whether you're going on a big off-road adventure or opting for a leisurely outing, Sidi has thought of everyone with a range of products that can't be missed on a motorcyclist's wishlist. From the emblazoned models created in collaboration with the great riders of the international stage, to the practical and comfortable touring models. In this letter to Father Christmas, there is something for every taste, suitable for every occasion and attitude.

The king of the holidays is undoubtedly the [Crossfire 3 SRS](#), chosen and worn by top riders. Its technological details, such as the Hyper Extension Block, the Flex System and the Adjustable Calf System, meet the most specific needs of riders, making it a top-of-the-range product. Crossfire 3 SRS is also definitely Sidi's most creative boot, with the numerous possibilities to customise the style, making it easy to match the most imaginative outfits, thanks to its eye-catching look.

For lovers of rough and less-travelled roads there is the [X Power Enduro](#): comfortable, stylish and incredibly versatile on all terrain. Thanks to the Flex System, this boot is particularly articulated, offering great riding performance while the heel promises a high level of protection. Precise fastening and a specific non-slip sole guarantee maximum comfort even on steep and rough terrain, making the X-3 the perfect choice for the most adrenaline-fuelled challenges.

When it comes to the latest trends, the [Adventure 2 Gore](#) Gore leads the way with its minimalist design and its Mid version, which offers a shorter boot in keeping with the trends of these years. Both models are part of Sidi's touring family and show a distinct vocation for off-road adventures - as the name suggests. Their main characteristic is undoubtedly their strong adaptability to the most varied situations, thanks to some special features such as the anatomic heel, shaped to guarantee comfort and impact resistance. The comfortable and snug fit makes the Adventure 2 Gore a reliable companion for outings of any length on any terrain.

Technological and practical, the [Gavia Gore](#) is dedicated to lovers of long journeys. With its ultra-lightweight full-grain microfibre upper and GORE-TEX® lining, it protects from water and ensures maximum breathability. It is undoubtedly exceptional for carefree all-weather adventures, keeping the foot cool in summer and pleasantly warm and dry in winter.

Four boots that represent Sidi's manufacturing excellence at three hundred and sixty degrees and populate the imagination of enthusiasts with dreams of kilometres travelled in freedom or challenges on the track with themselves.
