

Uragan at Internorga 2023

From 10 to 14 March, the brand will show visitors excellence in washing technology.

The appointment with Internorga is back. The world's most important brands in the Ho.Re.Ca. sector will be in display. Among them will be Uragan by Univerbar, which will show the public its potential in professional dishwashing and sanitising.

On stand 215, Hall A4 there will be two machines, one of which will be installed in an area dedicated to home espresso machines from Wega and Astoria, where, in a cosy kitchen lounge environment, visitors will be able to see the synergy between the different types of products. In particular, it will be possible to appreciate Uragan's best technology to guarantee maximum results. Osmosis, directly integrated into all products in the line - Uragan 40, Uragan 50 and Uragan Hood - and ozone, a powerful ally against germs and odours. Both represent the absolute plus that makes Uragan products a benchmark for the market.

The appointment is from 10 to 14 March at the Hamburg Messe in Hamburg, to discover the world of Uragan and smart washing.
