

Wega at the World of Coffee in Athens with Nova

Ergonomic, non-slip barista-style lances make this machine a champion of latte art

Wega is preparing for the most important European specialty coffee fair with one of its authentic workhorses. The minimal and defragmented shapes that characterize Nova will be the stars of the Veneto brand's stand, which opens the doors to functionality and experience.

Featuring a touchscreen display for an intuitive and fast interface, the machine has a large working area for the barista, illuminated with double LED spots for each group. The integrated riser allows two versions of the machine groups to be used with a single movement. Designed to enhance the user experience with its ease of use, Nova is above all a real guarantee of the highest quality and consistency of milk. Its innovative anti-skip steam wands are now more ergonomic than ever, in pure barista style, to make milk frothing even easier.

In addition to Nova, visitors will be able to fall in love with the eye-catching street lines of the Urban 2gr Multiboiler in stainless steel displaying an industrial character. Designed with multidisciplinarity in mind, this is a machine to discover as it incorporates three patented technologies: Wega Power Regulation, which allows you to get the most out of your coffee extraction, Wega Power Stream, which produces drier steam for better milk consistency, and finally Wega Power Boost, dedicated to moments of intense work to maintain high-level performance.

You'll also be able to take a close look at the new J-65 Touch grinders on the stand, to complete the short yet intense immersion into the Wega rock world that awaits enthusiasts and professionals at the Athens Metropolitan Expo from 22 to 24 June in Hall 3, Stand N40.
