

**All new top-of-the-range grinders from Macap come together at HOST 2023
The new LEO 55 Easy and LEO 55 Touch with 2.4" touch screen display will be on
show for the first time**

A new edition of HOST is just around the corner: from 13th to 17th October, the entire Ho.Re.Ca. sector will meet at Rho Fiera Milano to discuss the latest innovations. The perfect setting to present the Macap line of professional coffee grinders to the public. Brand ambassador Renata Zanon will also be present at the stand to guide enthusiasts through the world of the brand, with various engaging activities.

For lovers of refined lines, Macap presents two new versions of the LEO 55: LEO Touch - equipped with a 2.4" touch screen display - and LEO Easy, two authentic design objects conceived to complete and complement the line. The new 55 mm flat grinders are patented with a reduced coupling for better parallelism, and the screwless system for even more convenient removal allows quick and incredibly intelligent cleaning.

Representing ergonomic excellence, the MI20 Touch, MI40 Touch and MI40 Pro will be on display, featuring higher performance grinders. The linear and compact design of these products houses an innovative 3.5" touch screen display and intuitive HMI technology developed in-house.

Visitors will also be able to take a closer look at the LABO 70M coffee grinder, sponsor of the Aeropress World Championship Final in Melbourne, and the LABO 70D, the official coffee grinder of the 2023 World Latte Art & Coffee in Good Spirits Championship.

So come and visit us from 13 to 17 October at stands E12-E21-G12-G22 in Hall 24 with all the new Macap products to bring the tradition and magic of speciality coffee to your home.
