

# BARISTA ATTITUDE

**HOST 2023, all eyes will be on the excellence of Barista Attitude.  
Visitors will be able to take a closer look at the Pilot Single Boiler, Tempesta  
Gara and the new FARO grinder by Grindie.**

The most important event in the Ho.Re.Ca sector returns to Fiera Milano Rho from 13th to 17th October and Barista Attitude is preparing to welcome visitors from all over the world on a journey to discover the brand's latest innovations.

The new Pilot is ready to capture the attention of coffee enthusiasts and industry experts alike, with its intuitive handling for top quality performance. As Barista Attitude's first single boiler machine, it promises to simplify the lives of tomorrow's great baristas with a simple and informative interface. Pre-infusion can be set on two parameters: how long the water is in contact with the coffee cake and how long it remains in contact before extraction begins. The Pilot also features an anti-scald steam wand for greater safety and ease of control. In addition, the Super Dry system and the high ergonomics of the wands guarantee a perfect result with milk-based drinks, preserving taste and quality.

During the fair, visitors will also be able to discover all the features of the new FARO by Grindie. This coffee grinder grinds by weight, guaranteeing consistency and an accuracy of +/- 0.1g, thanks also to a patented A.I.-assisted self-learning system. In addition, Double Clump Crusher ensures an even grind at all times, solving any channelling problems once and for all. The touch screen with user profiles offers maximum security for the parameters, which are password protected and cannot be changed. Finally, one of the advantages of this new product is that it is completely silent, thanks to a soundproofing system that guarantees peace and quiet at all times of the day.

In addition to these latest innovations, the Tempesta GARA 3 -group, the official machine of the World Barista Championships, will also be on display. In particular, this is the model used on stage by the finalists and the Barista World Champion during the last World Final in Athens in 2023, characterised by a unique and customised body.

In a special area dedicated to filter holders and machine showers developed with a new treatment, there will also be Profilo, a machine with a refined style and strong personality, dedicated to experimenters. Brand ambassadors Michalis and Emi will use the FRC to challenge each other in various competitions that will also involve visitors.

So come to Rho Fiera Milano from 13th to 17th October at stands E12-E21-G12-G22, pavilion 24, for a complete experience in the world of speciality coffee.
