

Barista Attitude at Internorga 2024 - the machines of champions are out to conquer Hamburg.

Gems of the Italian brand will be on display from 8 to 12 March.

Barista Attitude returns to Internorga with its iconic gems, Storm and Tempesta, dedicated to professionals who want to try their hand at personalised coffee extractions, and Pilot, designed for baristas who have just started out on high-level training paths. The Faro grinder will also be there with its new design dedicated to the three coffee machines on show.

Chosen as the official machine for the World Barista Championship up until 2025, **Tempesta** is designed for competition artists looking for excellence in every extraction. Its steel legs and futuristic design are the features that have already made it famous in the world of Specialty Coffee and spectators will be able to admire the "Gara" version and let themselves be captivated by the dedicated livery, double and bottomless portafilters and WST competition baskets.

Characterised by details in oak, **Storm** has been designed to enthrall users and blend in with trendy environments. No-burn arched steam wand, Super-Dry technology, manual or digital settings control: these are just some of the technical details that experimentation enthusiasts will fall in love with.

Completing the excellence of the Barista Attitude range, is **Faro**: the coffee grinder that promises to revolutionize the grinding process, allowing the barista to express their personality and instinct to the full.

Offering exceptional operation, this machine **grinds by weight**, ensuring a consistent grind and precision of +/- 0.1 g, also thanks to a patented AI-assisted self-learning system. Furthermore, Grindie's Double Clump Crusher system guarantees an even grind every time, solving all channelling issues once and for all. The touchscreen with user profiles ensures maximum safeguarding of parameters that cannot be inadvertently altered thanks to a security system. Last but not least, one of the plus points of this new product is its totally silent operation, thanks to soundproofing that guarantees peace and quiet throughout the day.

The Barista Attitude philosophy awaits visitors in Hamburg from 8 to 12 March (Hall A4, stand A4 215) to tell them about the culture of coffee, also through ambassadors Ella Simon, German winner of Barista 2023, and Johannes Otto, German winner of Latte 2020-2022 who will be there operating the machines.
