

Macap at WOC Copenhagen to present the latest innovations for 2024

The star will be the MI40 PRO, the professional coffee grinder that promises unprecedented performance.

The date for the World of Coffee in Copenhagen is fast approaching and Macap is getting ready to show visitors from all over the world its excellence in precision grinding, through smart solutions designed to meet the most varied needs.

At Macap booth, visitors will be able to immerse themselves in a professional atmosphere with MI20 Touch, MI40 Touch and MI40 PRO. The latter offers increased grinding performance (3.5 - 4 g/s) and an upgraded motor (600 W). It is also equipped with an adjustable cooling fan on the display and forced air intakes on the base to prevent overheating and ensure maximum performance at all times without any loss of production.

As far as the domestic line is concerned, the entire LEO range will be on show, an authentic design object capable of characterising rooms with its unmistakable elegance.

Visitors will be able to take a closer look at LEO 55 Easy, LEO 55 Essential, LEO 55 and LEO 55 Touch, equipped with an innovative 2.4" Touch Screen Display.

Ergonomics and practicality are the keywords that distinguish Macap, which is preparing to conquer Denmark.

In addition to the Macap products, on the workbench there will be Pilot, the single boiler machine by Barista Attitude with two groups in an elegant black color.

From 27th to 29th June, the brand will be in Hall E, Stand ED-007, at the Bella Center in Copenhagen, to offer enthusiasts an overview of its excellence and a demonstration of the precise efficiency of its creations.
