

*From the roads of the WorldTour to the next evolution of its ecosystem, Nimbl introduces the Ultimate Collection, its first collection of performance cycling apparel.*

From the roads of the WorldTour to the next evolution of its ecosystem, Nimbl introduces the Ultimate Collection, its first line of performance cycling apparel, designed to enhance the rider's efficiency and integrate seamlessly into a complete performance system.

Stemming from the same philosophy that defines its high-performance footwear, the apparel collection reflects Nimbl's commitment to precision, innovation, and craftsmanship. Designed and developed in Italy, every piece carries forward the brand's obsessive attention to detail, where materials, construction, and fit are engineered with one goal: performance.

This represents a natural evolution of the brand's premium performance ecosystem into apparel.

With the **Ultimate Collection**, Nimbl introduces the Rider's Performance Advantage, which is defined not by individual components, but by a cohesive system of rider, bike, shoe, and apparel. This principle forms the foundation of the collection where each garment features a performance-driven, race-inspired fit that works with the rider's body to enhance efficiency and reduce aerodynamic resistance. Every detail is designed to improve performance, as the rider accounts for over 75% of total resistance.

Developed in collaboration with Team Visma-Lease a Bike, the Ultimate Collection integrates professional insights into a collection designed for demanding cyclists. The same principles that support athletes in the most challenging races are applied to a collection built for high-intensity riding, laying the foundation for a broader apparel ecosystem.

Every piece reflects Nimbl's design philosophy, featuring a performance-driven fit and targeted compression zones. Advanced materials support efficiency and thermoregulation, resulting in apparel that performs consistently under physical stress.

Future collections will expand the range to address different riders' needs and profiles, while maintaining the same commitment to quality, innovation, and performance.

#### Technological core

- **Ventoo™ Technology.** A textured fabric solution designed to “activate” airflow, reducing aerodynamic drag during high-speed efforts.
- **N3X™ Tech Chamois.** Developed with Elastic Interface®, this 3D-printed lattice structure replaces traditional foam, ensuring consistent support and stability over long distances.
- **Thermal Balance System.** By optimizing fabric density, the Ultimate collection promotes the release of metabolic heat while reflecting solar energy, supporting the rider's thermal equilibrium even in demanding conditions.
- **Solar Shield.** A fabric engineering system designed to manage the rider's internal temperature, combining solar reflection with accelerated heat release. The result is improved thermal stability, helping riders stay efficient and perform longer under pressure.

*“With the launch of our technical apparel, we complete our ecosystem, making the innovation we developed for professionals finally accessible to every cyclist,” says **Francesco Sergio, MD and co-founder of Nimbl.** “We have applied our obsessive attention to detail from footwear to fabrics, so that the technology empowering World Tour champions is now available to anyone seeking the highest level of performance and speed. It is the natural step for a brand committed to turning elite excellence into a standard for the entire cycling community.”*

---

**About Nimbl** Nimbl is a high-performance cycling brand committed to the highest standards of quality, preserving Italian craftsmanship while driving innovation. Known for its handcrafted shoes worn by WorldTour athletes, Nimbl helps cyclists optimize energy transfer without compromising comfort or style. With the expansion into apparel, Nimbl continues to serve riders who demand the best — delivering a system built to elevate performance, watt after watt.

## Nimbl beyond the Finish Line. Total integration between athlete and performance

**Eric van de Meent, Global director**, adds: *“We wanted every piece in the Ultimate collection to be more than just apparel—we wanted it to feel like a true extension of the rider’s body. Every seam, fabric, and detail has been designed to maximize performance and reduce any friction between cyclist and speed. Our data-driven approach, combined with continuous collaboration and testing with Team Visma- Lease a Bike, allows us to bring World Tour experience directly to the community, bringing World Tour-inspired performance to ambitious riders seeking a higher standard in their complete setup.”*

This marks a new chapter for Nimbl, as it extends its expertise beyond footwear and reinforces its vision of performance as a complete system, where every component works together to support riders at the highest level.

The Ultimate Collection will launch in selected markets through select Nimbl retail partners and through [Nimbl.cc](https://nimbl.cc). For a limited time after the launch, access will be reserved for registered users only, giving the community an exclusive early access window.
